

A1

20. (Amended) A structure characterized by being constructed using the manufacture method as claimed in any one of claims 11 to 17.

A2

50. (Amended) A liquid tank characterized by being constructed using the manufacture method as claimed in any one of claims 35-42 and 44-47.

51. (Amended) An ink jet apparatus characterized by comprising a negative-pressure generating mechanism that exerts negative pressure on a liquid tank as claimed in any one of claims 21, 22, 26, 27, 30 and 31 to introduce a liquid into the liquid tank.

FIG. 10

A3

60. (Amended) The ink jet apparatus as claimed in any one of claims 52, 56 and 59, characterized in that said gas-liquid separating element comprises PTFE.

A4

62. (Amended) The ink jet apparatus as claimed in any one of claims 52, 56 and 59, characterized in that said liquid tank is stored ink or a treatment liquid that orients a print property of the ink on a print medium.

A5

71. (Amended) An ink jet apparatus characterized by being constructed using the manufacture method as claimed in any one of claims 63 to 68.

72. (Amended) A head cartridge characterized by comprising:

a liquid tank as claimed in any one of claims 21, 22, 26, 27, 30 and 31; and

a liquid ejecting head having an ejection opening that ejects a liquid supplied by said liquid tank.

AS
concluded

73. (Amended) A head cartridge characterized by comprising a liquid ejecting head having an ejection opening that ejects a liquid supplied by a liquid tank as claimed in any one of claims 52 to 59.

AL

75. (Amended) An image forming apparatus characterized by comprising:
a carrying portion which a liquid tank as claimed in any one of claims 21, 22, 26, 27, 30 and 31 and liquid ejecting head having an ejection opening for ejecting a liquid supplied from the liquid tank are attachable; and
means for moving the liquid ejecting head with respect to the print medium.

76. (Amended) An image forming apparatus characterized by comprising:
a carrying portion which a liquid tank of an ink jet apparatus as claimed in any one of claims 52 to 59 and liquid ejecting head having an ejection opening for ejecting a liquid supplied from the liquid tank are attachable; and
means for relatively moving the liquid ejecting head to the print medium.

77. (Amended) An image forming apparatus characterized by comprising:
a carrying portion which a head cartridge as claimed in claim 72 is attachable; and
means for relatively moving the head cartridge to the print medium.

REMARKS

Claims 20, 50, 51, 60, 62, 71, 72, 73, and 75-77 have been amended to place those claims in proper multiply-dependent form and/or to correct minor grammatical
